

CAUTION

FOR YOUR SAFETY: PLEASE MAINTAIN AT LEAST A 300' SAFETY ZONE AT ALL TIMES AROUND THESE WORKING BARGES, TUGS AND SCOWS WHILE IN THE BOSTON HARBOR FEDERAL NAVIGATION CHANNEL. **DO NOT ATTEMPT TO APPROACH.**

-THESE PLANTS ARE DRILLING, LOADING EXPLOSIVES, AND EXCAVATING ROCK. TUGS ARE UNABLE TO MANEUVER SCOWS TO AVOID RECREATIONAL BOATERS. EXCAVATORS HAVE A BOOM SWING GREAT ENOUGH TO DAMAGE BOATS PASSING CLOSE TO THE DREDGES.

-PLEASE HAVE YOUR VHF RADIOS TUNED TO CHANNEL 13 FOR SHIP TRAFFIC COMMUNICATIONS AND UPDATES ON BLASTING TIMES AT WHICH POINT THE CHANNEL WILL BE TEMPORARILY SHUT DOWN.

-BOATERS ARE ALSO URGED TO BE AWARE THAT CARGO AND CONTAINER SHIPS, TUGS, BARGES AND TANKERS ARE TRANSITING THE CHANNEL AND ARE UNABLE TO MANEUVER AROUND RECREATIONAL BOATERS.

This Massport/US Army Corps Boston Harbor Deepening Project is expected to be complete by Summer 2022. Thank you for your patience and taking the necessary safety precautions.
