Cheryl, Thanks so much for helping us get the word out!

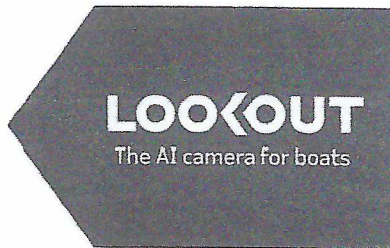

We are looking for members of MBYCA clubs, to join the LOOKOUT pilot program. LOOKOUT uses AI to spot hazards like buoys, debris, logs, and other boats and highlight them on the camera view. We are offering a limited number of systems to install and use this season at no cost. We hope to get LOOKOUT on to 30-60' boats going "interesting" places, navigating at night, through congested waters, or areas with floating hazards like lobster pots.

More about the LOOKOUT is here in this video: http://bit.ly/LOOKOUT_Story
And this presentation: https://bit.ly/LOOKOUT_Briefing

A short form to apply to the LOOKOUT pilot program is here:
